

# Basic Concepts of Clinical Design Part I

*Robin Chalmers, OD, FAAO*

A 1979 graduate of UC Berkeley School of Optometry, Dr. Chalmers is an independent clinical trial consultant with research interest in measurement of symptoms in dry eye, epidemiology of complications with contact lenses and post-market surveillance of contact lens health outcomes. She practiced for six years and then transitioned to research for CIBA Vision in Atlanta, GA in 1985. For the last 20 years she has had her own Clinical Trial Consulting business.

She is a past chair of the American Academy of Optometry (AAO) Fellows Doing Research (FDR) Special Interest Group and collaborated with Netherlands Contact Lens Conference (NCC) on their first NCC Doing Research Booth project.

Most recently, she conducted the ReCSS Study post-market surveillance study of safety of soft contact lenses in 963 children. She was Principal Investigator of the TEMPO Registry of daily disposable contact lenses and other studies that demonstrated the increased safety profile with use of daily disposable contact lenses.
